PROFESSIONAL SUMMARY

Results-driven SQA Engineer with 1+ year of professional experience delivering quality across government-scale and enterprise software products. Reduced manual regression effort by 35% through Selenium automation and maintained 98% defect reproduction accuracy across all release cycles. Skilled in the full QA lifecycle — from test planning and case design through API validation, performance testing (JMeter), and CI/CD integration. Thrives in Agile teams, with a collaborative approach that bridges QA and development to ship reliable, accessible, and high-performance software.

WORK EXPERIENCE

Software Quality Assurance Engineer · **Apurba Technologies Ltd.** *June 2025 – Present | Dhaka, Bangladesh*

- Owned end-to-end QA for OCR-based and accessibility-focused government platforms, covering functional, regression, and cross-platform testing in an Agile sprint cycle.
- Designed and implemented Selenium (Python) automation scripts that reduced manual regression workload by 35%, freeing the team for exploratory and edge-case coverage.
- Validated government accessibility systems against compliance standards, improving product reliability and audit readiness.
- Produced structured test cases, bug reports, and release notes that improved QA–Dev handoff speed and reduced re-open rates.

Software Quality Assurance Trainee · **Dream71 Bangladesh Ltd.** *June 2024 – October 2024 | Dhaka, Bangladesh*

- Executed functional and regression test cycles for UNDP-funded government digital transformation projects, covering web and mobile surfaces.
- Designed test scenarios and ran performance/load tests with Apache JMeter; findings directly informed pre-release infrastructure decisions.
- Documented, triaged, and tracked critical defects in Jira; collaborated with developers to achieve timely, verified resolutions.

Executive Officer · **Data-Path Ltd.** *November 2022 – January 2024 | Dhaka, Bangladesh*

- Processed and validated 401(k) plan data for U.S.-based clients, applying a detail-oriented, accuracy-first workflow transferable to QA environments.
- Automated routine reporting tasks using MS Excel macros and SQL queries, reducing processing time and manual error rates.

Teaching Assistant — Computer Science · **American International University–Bangladesh (AIUB)** *June 2021 – January 2022 | Dhaka, Bangladesh*

- Facilitated lab sessions in C++ programming and computer graphics for 50+ undergraduate students; translated complex technical concepts into clear, hands-on exercises — a skill directly applied in QA documentation and team knowledge sharing.

TECHNICAL SKILLS

Testing	Manual · Functional · Regression · Smoke · Sanity · API · Performance · Load · Accessibility · Cross-Platform
Automation	Selenium (Python) · Test Suite Design · CI/CD Pipeline Integration

Performance	Apache JMeter — Load, Stress & Scalability Testing
API Testing	Postman · REST API Validation · Python requests library
Bug Tracking	Jira · GitHub Projects · Confluence · Test Management
Languages	Python · Java · C# · SQL
DevOps / SCM	Git · GitHub · CI/CD · Agile · Scrum · STLC · SDLC
Databases	MySQL
Tools / IDEs	VS Code · IntelliJ IDEA · Postman · MS Excel
Learning Next	Docker · Kubernetes · Kafka · RabbitMQ · Redis · Microservices · WebSocket

KEY PROJECTS

- **Bangla OCR System (Govt. — ocr.bangla.gov.bd)** [Selenium, JMeter, Manual Testing, Windows/Linux/Android] — Led end-to-end SQA for the national OCR portal; validated text accuracy, CRR metrics, and image/PDF processing. Tested MS Word and LibreOffice plugins across Windows, Linux, Web, and Android.
- **Kagoj.ai — AI-Based Bangla OCR (Govt.)** [Functional Testing, Edge-Case Testing, Defect Documentation] — Validated image upload workflows, AI text-extraction accuracy, and system behavior; documented defects and proposed usability improvements adopted in the next release.
- **Screen Reader ALO — Accessibility Application (Govt.)** [Accessibility Testing, Cross-Platform, Mobile & Desktop] — Comprehensive SQA for a screen reader targeting visually impaired users. Validated WCAG-aligned functionality and cross-platform performance on Windows and Android.
- **Font Conversion Engine (Govt. — fontengine.bangla.gov.bd)** [Cross-Platform Testing, Compatibility Testing] — Tested ASCII-to-Unicode Bangla font conversion across web and desktop; ensured version compatibility and consistent usability across platforms.
- **BSCIC Online Market — Govt. E-Commerce Platform** [Apache JMeter, Load Testing, Performance] — Executed load and performance testing simulating 10,000+ concurrent users; identified bottlenecks and validated scalability before national rollout.
- **Selenium Regression Automation Suite** [Selenium, Python] — Architected an automated regression suite from scratch; reduced repetitive manual test execution by 30% and increased release confidence through consistent, repeatable coverage.
- **Spotify API Integration Testing** [Postman, Python requests, REST API] — Built a Python-based API validation framework; improved API test coverage by 40% and enabled faster regression cycles for API endpoints.

EDUCATION

B.Sc. in Computer Science and Engineering (CSE) *2018 – 2022*

American International University – Bangladesh (AIUB)

CERTIFICATIONS

- SQA Trainee Certification — Dream71 Bangladesh Ltd.

KEY ACHIEVEMENTS

- Maintained 98% defect reproduction accuracy consistently across all test cycles and product releases.
- Reduced manual regression workload by 35% through Selenium automation implementation at Apurba Technologies.
- Improved API test coverage by 40% via a custom Python-based validation framework for Spotify API integration.
- Successfully simulated 10,000+ concurrent user load tests for a national government e-commerce platform.
- Streamlined QA documentation and test management using Jira, Confluence, and GitHub Projects — reducing re-open rates and improving cross-team transparency.
